

Brass Compression Fittings - Parallel Thread (BSPP)

Labfacility are the UK's leading manufacturer of Temperature Sensors, Thermocouple Connectors and associated Temperature Instrumentation and stockings of Thermocouple Cables. The Company has been trading since 1971 and is ISO9001 accredited.

To suit a wide range of mineral insulated and other probe type sensors offered by Labfacility.

Brass compression fittings with parallel BSPP (British Standard Pipe Parallel) threads are widely used for securely connecting pipes and tubes in various applications.

BSPP threads have a constant diameter, which requires a sealing washer or O-ring to create a leak-proof seal.

Made from brass, these fittings offer good corrosion resistance, durability, and ease of installation, making them suitable for plumbing, HVAC, and low to medium pressure applications in water, air, and gas systems.

Specifications

Specifications

General Description	Male in-line compression type with nut & olive
Material	Brass
Thread	1/8"BSP or 1/4"BSP available
Probe Diameter	Suitable for both metric and imperial probe diameters from either 1.5mm, 3.0mm or 3/16"
