TEMPERATURE & PROCESS TECHNOLOGY

Datasheet

The

316 Stainless Steel Penetration Probe is designed for accurate and reliable temperature measurement in liquids and semi-solid materials. Featuring a pointed stainless steel tip for easy insertion, this durable probe is ideal for a wide range of industrial, laboratory and general temperature monitoring applications.

Supplied complete with a comfortable handle, 2-metre coiled cable and Lemo connector, the probe offers convenience, flexibility and ease of use.

Need Your Temperature Sensor Calibrated?

Labfacility offers an optional
3-point or 5-point traceable calibration
through our in-house calibration facility, with temperature points selectable between
-10°C and +200°C
.

Our calibration services are traceable to ISO/IEC 17025 (UKAS) calibration standards, providing additional confidence in your temperature measurement results.

Important:
If you select a calibration option when ordering, our team will contact you to confirm delivery information.

Specifications

Specifications

Product Code	XE-3890-001
General Description	Penetration Probe with a pointed tip
Sensor Type	PRT
Probe Diameter	3.3mm
Probe Length	120mm
Cable Length	2m
Max. Temperature	+400°C
